Human Resources is a “new” organization, merging together the Human Resources and Payroll teams. Since the official merge on March 1, 2008, Human Resources and Payroll have begun assimilating some of the functions to provide more efficient services to Butte County employees. This merger realigns functions, that may have overlapped, to create a more efficient employee support process. An integrated team dramatically increases efficiency because it creates consistency in managing employee information. *“We are excited to be a part of this dynamic change and look forward to an ongoing process of streamlining the way we do business to better serve the employees of Butte County”* (Jeanne Gravette, Human Resources Director).

The Human Resources team names, functions, and phone numbers may be found on page 3 of this flyer.
