JOB SITE REQUIREMENTS FOR RESIDENTIAL ROOF MOUNTED PHOTOVOLTAIC SYSTEMS

☐ 1 Roof-layout plan which include:
   - Proposed location of the photovoltaic panels on the roof
   - Proposed location of the inverter
   - Indicate flush mount or panel to roof plane angle

☐ 1 Copy of the manufacturer’s specifications for the inverter and the photovoltaic panels (showing panel length, width and weight)

☐ 1 Copy of the manufacturer’s installation instructions with details depicting connection to the roof framing.

Please note that it either of the following exists at the site:
   ➢ Panel and support framing exceeds 3.0 pounds per square foot.
   ➢ Panel to roof plane angel exceeds 30 degrees or 40 degrees from horizontal.

**Engineer or architect design is required and the project is not eligible for online application.**

**Notes:**
Engineered photovoltaic systems will require plan check review.

Installation shall conform to the California Electric Code (CEC) Article 690, Solar Photovoltaic Systems. All equipment and components shall be listed and labeled by Underwriters Laboratories or other recognized agency.
