

If You Decide To Stay Home:

- Remain calm and speak to your animals regularly in a calm, reassuring voice.
- Bring animals indoors well ahead of a pending disaster.
- Do not leave domestic pets outside or tied up.
- Prepare an area for your companion animals to use inside the house away from the windows. Pets will be most comfortable and secure in pet carriers.
- Let haltered livestock roam in large, fenced pastures away from possible flying debris. (Tin roofs for instance can be lethal.) There should be no overhead power lines. Keep a defensible space around pens.
- Difficult, dangerous animals should be placed in special carriers to reduce the possibility of escape.
- Do not allow animals to consume food or water which may have become contaminated.
- Walk your animals on a leash or lead until they become re-oriented to their home.
- Do not allow animals to roam freely.

If You Are Not Home:

- Make arrangements well in advance for a trusted neighbor to take your pets and meet you at a specified location. Be sure the person is comfortable with your pets and your pets are familiar with them. The neighbor may need access to your home.
- Make sure the neighbor knows your pets' whereabouts and habits, so they will not have to waste precious time trying to find or catch them.
- Create a pet emergency/disaster kit and place it in a prominent place where your neighbor can find it.
- If the emergency involves evacuation, make sure the neighbor would be willing to take your pets and has access to the appropriate carrier, halter, leash and trailer. Plan to meet at a pre-arranged location.

Animal I.D. Information:

- Tattoos and microchips are a permanent form of identification. Check with your local animal shelter or veterinarian for information on tattooing and microchipping.
- Livestock should be identifiable; have some type of identification if possible. Luggage tags on halters with name and contact number; spray paint symbol, tattoos or ear tags.
- A current photograph of each animal with a matching identification number should be available. Include a close-up of any special identifying marks. Also include yourself in some of the photos as proof of ownership

Butte County
has an estimated
3,500 horses,
plus cattle and
other livestock!

Butte County Animal Control Disaster Preparedness for Animals

68%

of U.S. households have pets.
In the event of an emergency, their survival
is ultimately *your* responsibility.

Prepare BEFORE Disaster Strikes:

- Disasters are diverse and devastating to everyone involved, including animals. Situations like fire, floods, wind and earthquakes can leave pets helpless. Planning can save the lives of beloved companion animals and livestock.
- Ask dependable friends or relatives who live away from an at-risk area, if you and your animal can stay with them during an emergency. Keep their phone numbers with other important contacts in your purse or wallet.
- Develop an evacuation plan which includes your animals. Review and update it regularly. Learn which shelters and motels take companion animals and/or have a designated evacuation shelter(s). Practice and update your plan.
- Survey boarding kennels to determine specific locations. Find out who stays on the premises with the animals in the event of an emergency and what provisions have been made should the kennel occupants have to evacuate.
- Check with veterinary clinics to determine which have boarding facilities and if they will take evacuation animals. Check what they require for vaccinations.
- Stay tuned to your local news media for disaster coverage and the safest evacuation routes.
- Be prepared to evacuate when advised by local authorities. Have all supplies, kits, transportation and evacuation locations prepared now. Waiting until an evacuation is ordered to start planning will delay your safe evacuation and possibly expose you to traffic tie-ups and other risks.
- Stock an animal emergency supply kit to take with you.
- All belongings should be marked with identification.
- Take First Aid and CPR courses and keep the manuals handy. The same basic principles apply to animals.
- Supply appropriate housing, food and water.

**Butte County has an
estimated 50,000 Dogs and
54,000 cats!**

Pet Emergency Supply list:

- Update all vaccinations and include records, ownership papers and current photo of each pet.
- Water bowls and bottled water in plastic bottles for three to five days per animal.
- Food bowls and food for three to five days per animal and a manual can opener. Dry foods are recommended.
- Disinfectant and cleanser to handle animal waste.
- Cat litter, disposable litter pans and plastic bags.
- Proper size pet carrier for each animal that allows them to stand and turn around.
- Towels and blankets, toys, brushes and combs.
- Leashes and collars with current license, identification and license tags attached securely. Have your pet micro chipped and register them with Animal Control.
- ½ dozen gauze bandage squares and a roll of 2 inch wide gauze.
- Bandages, adhesive tape and scissors.
- Antiseptic (hydrogen peroxide or tame iodine such as Betadine) and antibiotic ointment.
- Saline solution or eye wash and eye ointment.
- An ice pack.
- Tweezers and needle nose pliers (to remove splinters, ticks, porcupine quills, etc.)
- Disposable razor (to clean around open wound).
- Syrup of ipecac (to induce vomiting).
- Any regular medications.

Pocket Pets, Birds & Reptiles

Keep these animals confined to small carriers and make sure food and water is available. Reptiles can be transported in a pillow case. Take a water bowl large enough for soaking and a heating pad. Try to keep the animals at a comfortable temperature.

Barnyard & Large Animals

Have a list of emergency contacts and/or neighbors and a disaster plan posted in an accessible place for those that use your facilities. The animals you plan to transport out of the disaster area should be familiar with entering and exiting the trailer. Have the trailer stocked prior to the emergency. Most disasters give some advance warning.

Your disaster supply checklist for horse/large animals should include:

- Bleach/disinfectant
- Plastic trash barrel with lid
- Tarpaulins
- Water buckets
- First aid items
- Betadine or Nolvasan solutions
- Antibiotic ointment
- Gauze squares and bandages
- Ichthammol ointment (feet)
- Eye Ointment
- Fire resistant, non-nylon leads and halters
- Knife, scissors, wire cutters
- Duct tape
- Livestock markers or paint
- Leg wraps

Large Animal Food Water Requirements

Most herbivorous animals will eat 1-2% of their body weight in some form of "roughage". Roughage is hay or hay-like products (pellets, cubes, hay, etc.). Horses, as well as cattle, can drink anywhere from 5- 15 gallons of water a day depending on the temperature, stress, workload and disaster.
