State Legislative Platform

Strategies to Preserve a Safe, Healthy, and Prosperous Community
About
Butte County is a place of natural beauty with countless opportunities for recreation in both rural and urban environments. Many Butte County residents live in one of the five incorporated towns or cities: Biggs, Chico, Gridley, Oroville or Paradise. Butte County government provides services to residents through 23 diverse departments. Services include elections, road maintenance, public safety, public safety, solid waste disposal, and health and human services to name a few.
Protecting our Citizens
Butte County strives to provide a safe and healthy community for its citizens.

Preserving our Communities
Safeguarding our way of life against the challenges of today and the changes of tomorrow by protecting the County’s strong agriculture roots and promoting community unity.

Planning for our Future
Smart economic expansion, growth, and sustainability are top priorities for Butte County.

PUBLIC INFRASTRUCTURE

California Water Issues

Summary of the Issue

The Northern Sacramento Valley region is the area-of-origin for much of the water that flows through the Delta. Butte County’s surface water resources, including Lake Oroville and a network of creeks and rivers that are tributary to the Sacramento River, feed the Delta. Many of the streams provide invaluable habitat necessary for the sustainability of threatened and endangered species such as the Spring Run Chinook Salmon.

The Sustainable Groundwater Management Act of 2014 fundamentally changed how water resources and land use are managed. Although the Act will take many years to implement and its impact may not be felt for over a decade, a number of important implementation decisions will be made in the next few years. As implementation unfolds, efforts may be advanced to amend the Act to clarify its intent. Butte County should actively engage in any effort to amend the Act to preserve County police powers, land use, water management and well permitting authorities. Additionally, the State of California has a financial obligation to offset the local cost of implementing the Act. Butte County will work to assure the Act does not place any unnecessary local obligations and that the State provides funding to local agencies. The State of California, through previous water bonds and the recently enacted one, will provide an opportunity to fund projects beneficial to Butte County.

Requested Action and Strategy

- Support additional storage, protection of area of origin water rights, existing water right priorities, and local control over water management.
- Support implementation of the Sustainable Groundwater Management Act that eliminates unnecessary local obligations, provides financial assistance to local agencies and preserves county land use, water management and well permitting authorities.
- Identify and advocate for projects that will benefit Butte County and the Northern Sacramento Valley Integrated Regional Water Management efforts in the water bond and other funding opportunities.

Contact: Paul Gosselin, Water and Resource Conservation Director, 530-538-4343
Flood Management and Flood Control

Summary of the Issue
Levees in Butte County are in need of upgrading, repair and maintenance, to meet new Federal Emergency Management Agency (FEMA) accreditation and State certification requirements. In order to address the new requirements by FEMA and the Central Valley Flood Protection Board, funding is needed for planning and capital improvements. Examples of areas in need of funding include the urban and non-urban levees that protect much of the Chico Urban Area, levees along the Feather River that protect south County residents, the Butte Creek Levees, the Cherokee Canal Levees and the Rock Creek/Keefer Slough area.

If levees do not meet FEMA accreditation and State certification requirements, many residents in the south County and the Chico Urban Area will face increasing annual costs for flood insurance, as well as stricter development regulations.

Requested Action and Strategy
- Pursue budget action and/or legislation to provide access to funding for the improvement, repair and maintenance of levees in Northern California.
- Continue to advocate for inclusion of local water quality and flood control projects in Butte County to be funded from voter-approved bonds.

Contact: Dennis Schmidt, Public Works Director, 530-538-7681
          Tom Fossum, Deputy Director-Public Works Department, 530-538-7266

Highway and Other Infrastructure Improvements

Summary of the Issue
Reliable, safe, and modern public infrastructure is vital to the economic development of the County. Upgrading and maintaining our roads, water supply, and wastewater infrastructure not only helps the County provide basic services to our current citizens, but also provides the foundation for future economic growth and business development.

From the Butte County line to Highway 162 in Oroville, Highway 70 has seen numerous fatalities since 1992. Between 2003 and 2009 there were 286 collisions recorded on Highway 70 between Oroville and Marysville, based upon data available from the Highway Patrol. This critical trade and travel corridor connects Butte County with Yuba, Sutter, and the Greater Sacramento Valley. Additional improvements are needed for the safety of those traveling Highway 70.

Requested Action and Strategy
- Identify and pursue funding for economic development and infrastructure improvement opportunities.
- Support the Butte County Association of Governments (BCAG) and CalTrans in their efforts to secure funding for Highway improvements.
- Support CSAC efforts promoting transportation legislation to fund necessary road upgrades and repairs.

Contact: Dennis Schmidt, Public Works Director, 530-538-7681
Solid Waste – Renewable Energy Projects – Conversion Technology

Summary of the Issue
State and federal mandates require local jurisdictions to increase waste diversion and decrease greenhouse gas emissions. New, green technology can be highly effective in helping jurisdictions achieve the mandates, but currently there are many obstacles preventing the development of facilities utilizing new conversion technologies. Obstacles include lack of proper definitions for new technologies, improper placement in CalRecycle’s hierarchy of waste handling priorities, unclear permitting pathways, inability to qualify as a renewable energy project and inability for a conversion technology facility to qualify for diversion credits. Developing facilities that convert waste to energy are often infeasible without economic and other incentives. Currently, it is not feasible to implement some new, green technologies either due to the cost or an inability to qualify for financial incentives, or compliance programs. For example, conversion of solid waste to energy reduces dependence on landfills and creates a fuel source for renewable energy; however, such technology does not currently qualify for AB 939 diversion credits or renewable energy credits, making it infeasible to implement.

Requested Action and Strategy
- Support the passage of State and Federal legislation and regulations that would establish a clear pathway to encourage the development of conversion technologies; including clarification of the definition of conversion technologies and ensuring they qualify for appropriate renewable energy project status, financial and other incentives for producing renewable energy, reducing landfill disposal, and producing low carbon fuels.

Contact: Bill Mannel, Deputy Director, Waste Management Division, 530-879-2350

Storm Water Permits

Summary of the Issue
California’s Water Resources Board has adopted changes to its Industrial and Municipal General Storm Water Permits. In the opinion of a broad coalition of stakeholders, including the Rural County Representatives of California and the California State Association of Counties, the changes are above and beyond what the U.S. Environmental Protection Agency mandates and will result in hundreds of millions of dollars in additional costs with no proven environmental benefits.

Requested Action and Strategy
- Support efforts by CSAC to create a new funding method for local agencies to finance storm water management and flood control projects.

Contact: Bill Mannel, Deputy Director, Waste Management Division, 530-879-2350
   Tom Fossum, Deputy Director-Public Works Department, 530-538-7266
PROTECTING THE AGRICULTURE INDUSTRY

Agriculture Issues
Summary of the Issue

Agriculture is one of the primary economic drivers in Butte County. Reductions in funding and services, or increased costs to agricultural businesses, can cause harm to the local economy.

Requested Action and Strategy

- Support efforts to prevent the introduction and potential spread of invasive pests and diseases harmful to agriculture, including strengthening inspections at borders.
- Support an Irrigated Lands Program that will not increase costs to the growers and will provide reasonable, regulatory oversight in agricultural practices that may affect water quality of the state.
- Support proposals that maintain or increase funding for pesticide regulatory activities to protect the safety of workers, the public, and the environment, including funding for education, outreach, and compliance assessment activities related to the safe use of pesticides.

Contact: Louie B. Mendoza, Jr., Agricultural Commissioner, 530-538-7137
PROTECTING OUR CITIZENS

ADEQUATE FUNDING FOR LOCAL SERVICES

Adequate Reimbursement for Activities Related to the California Department of Water Resources’ Oroville Facility

Summary of the Issue

Butte County has been the host jurisdiction to the California Department of Water Resources’ (DWR) Oroville Facilities for over 50 years and during that time Butte County taxpayers have been subsidizing DWR’s operation of the facilities. To date, the State has not properly compensated the residents of Butte County for the costs incurred by the County providing services supporting the construction and operation, of the Oroville facilities. The County and its residents experience an annual loss of between $1 million and $6.9 million in property tax revenue because the state is not currently required to pay property taxes on the 41,000 acres of land associated with the Project. In addition, the County incurs costs of more than $5 million per year for local law enforcement, criminal justice, road maintenance, and fire and emergency response related to the facilities with no reimbursement from DWR.

DWR is currently seeking a renewal of its license for the facilities through the Federal Energy Regulatory Commission (FERC) and the County has asked that any new license include a provision of benefits to the County and its residents for the financial drain the project has had, and will continue to have, over the life of a new license.

DWR does generate revenue and inexpensive power from these facilities for the benefit of itself and others outside of Butte County.

Requested Action and Strategy

- Explore all opportunities for successful resolution of this issue, including, but not limited to, provision of lower cost water and electricity for the residents and businesses in Butte County.

Contact: Paul Hahn, Chief Administrative Officer, 530-538-7631
Funding for Mental Health and Drug and Alcohol Services

Summary of the Issue

Changes to behavioral health treatment funding as a result of the 2011 Realignment promised future improvements to funds available for both mental health and alcohol and drug treatment. For some time, the State had delayed payment to counties creating problems. It is acknowledged that these payments are now, for the most part, more timely. However, proposed changes to the Affordable Care Act (ACA) that are anticipated from the new federal administration may have significant financial impact to Behavioral Health funding with regard to state and federal reimbursement for the newly expanded population which has grown substantially since January 2014.

Since January 2014, increased reimbursements for Medi-Cal eligible behavioral health services have allowed the County to expand services in the areas of substance use treatment, and mental health services to all adults with income below 133 percent of the poverty line (currently, 90 to 100 percent of cost for these services are now reimbursed to the County for this expanded population). This has resulted in increased services to special populations, including AB109 (early prisoner release populations), homeless youth, adults, and families. More individuals are now covered by Medi-Cal than ever before and receiving needed services with almost all costs to the County being reimbursed by state and federal dollars. Without the expansion of Medi-Cal to these individuals the entire cost of treatment and services will likely become the responsibility of local government and private institutions (counties, hospitals, law enforcement, etc.).

Requested Action and Strategy

- Advocate that any future changes to the Affordable Care Act provide adequate reimbursement of treatment to individuals with mental illness and/or substance dependence.
- Advocate for the continued inclusion of adults with income under 133 percent of the federal poverty line.

Contact: Dorian Kittrell, Behavioral Health Director, 530-891-2857
Mental Health Services Act Funding

Summary of the Issue
The Mental Health Services Act (MHSA) placed a 1 percent tax on personal income in excess of $1 million to fund mental health services in California Counties. In Fiscal Year 15/16 MHSA provided approximately $9 million for Butte County Department of Behavioral Health services. This act was intended solely for Counties to provide direct services to severely mentally ill clients, both youth and adult, as well as fund prevention and early intervention programming aimed at reducing serious mental illness. In 2016, for the first time, the State Legislature voted to take 7 percent of funds collected and designated for counties each year under the MHSA to fund a bond for a housing/homeless initiative. While the initiative has merit, it is anticipated to reduce funding to for mental health services in Butte County by approximately $700,000 per year. Furthermore, and most important, it has opened the door for MHSA funds to be considered for other projects that would divert important local funding to statewide issues at the discretion of the legislature. MHSA was intended for local jurisdictions to increase and enhance mental health services. Any potential legislative action rerouting these dollars for special projects leaves counties with uncertainty of sustainability of programming, and potentially reducing effective local initiatives.

Requested Action and Strategy
- Advocate for no further reductions of MHSA funding to Counties by the legislature or special interest groups.

Contact: Dorian Kittrell, Behavioral Health Director, 530-891-2857

CalPERS Actuarial Separation of Court Employees

Summary of the Issue
In 2000, SB 2140 enacted the Trial Court Employment Protection and Governance Act, which requires a trial court and county to participate under a joint PERS contract if the trial court is located within a county that contracts with PERS for retirement benefits. This results in pooled assets and liabilities, a single employer contribution rate, and a single benefit package. Recent changes in required reporting under GASB 68 and CalPERS’ separation of normal cost and required contributions against accrued liabilities have taken a difficult situation and made it unsustainable.

Requested Action and Strategy
- Support efforts to separate assets and liabilities of contracting counties from those of trial courts.

Contact: Meegan Jessee, Deputy Administrative Officer, 530-538-7632
Indian Gaming Special Distribution Fund

Summary of the Issue
The Indian Gaming State Distribution Fund (SDF) was established in 1999 as a mechanism by which Tribes operating more than 200 gaming machines would contribute a percentage of net win dollars to address the impacts of gaming. Some of these funds were designated for local government agencies to mitigate the local impacts of gaming. Over the years Butte County has designated these funds primarily for public safety functions. SDF funds have been decreasing over the years, primarily due to the State renegotiating compacts with Tribes to have the percentage of net win dollars bypass the SDF and go directly to the State. In 2014, all mitigation funds from the SDF to local government ended.

Requested Action and Strategy
- Support efforts to restore funding for mitigating local impacts of gaming.
- Support provisions to increase local autonomy in how funds are spent.

Contact: Andy Pickett, Deputy Administrative Officer, 530-538-7052

Marketplace Equity and Consumer Protection

Summary of the Issue
Weights and Measures programs are important to businesses and consumers in California as they ensure a level playing field for business. These programs are also critical in providing protection for consumers. Inspection programs to verify the accuracy of weighing and measuring devices are partially funded by device registration fees. The authority for these fees, in Business and Professions Code Sections 12240 and 12246, sunsets January 1, 2019.

Requested Action and Strategy
- Support efforts to extend or eliminate the repeal date in Business and Professions Code Section 12246 pertaining to device registration fees.
- Protect local authority for device registration fees.

Contact: Louie B. Mendoza, Jr., Agricultural Commissioner, 530-538-7137
Community Choice Aggregation

Summary of the Issue
Community Choice Aggregation (CCA), authorized by AB117, allows local governments to pool their electricity load in order to purchase and/or develop power on behalf of their residents, businesses, and municipal accounts. CCA allows local governments to become an energy purveyor and to purchase electrical energy on the wholesale market from any source. CCA is a supply model that works in partnership with the existing utility, which continues to deliver power, maintain the grid, provide consolidated billing, and other customer services.

The County is currently exploring the feasibility of CCA formation in Butte County or partnering with an existing CCA.

Requested Action and Strategy
- Oppose legislation that would restrict CCA formation, establish an opt-in only program, or add additional fees or surcharges to which an Investor Owned Utility is not subject.
- Support efforts to protect local governments’ right to participate in, or establish, community choice aggregation programs.

Contact: Brian Ring, Assistant Chief Administrative Officer, 530-538-7631
Protection of Local Revenue

Summary of the Issue

The State has chosen in the past to use local County resources to balance its budget. Historical efforts have included suspension of Proposition 1A and Proposition 42 - two initiatives that were approved by the voters in an attempt to safeguard local property tax revenues and transportation monies from being used too frequently to balance the State Budget. In 2010, California voters passed Proposition 22, which protects gas tax funds from being taken by the State, further narrowing the State’s options for balancing its budget, as well as Proposition 26, which reduces the State’s ability to adopt new fees and revenues. The State is left with few options for reducing its gap between on-going expenditures and revenues, which puts local County resources further at risk. Local resources are the primary funding source for public safety programs at the County level.

Requested Action and Strategy

- Oppose any effort by the State to borrow, defer, or take local discretionary revenue.
- Oppose the redirecting of existing revenues and/or the creation of additional unfunded mandates.
- Support efforts to generate new intergovernmental revenue and/or enhance existing revenue and reimbursement levels.

Contact: Paul Hahn, Chief Administrative Officer, 530-538-7631

Timely Payment for State and Federal Programs/Mandates

Summary of the Issue

Butte County provides a variety of public services on behalf of the State and Federal governments including, but not limited to, mental health, elections, social services, and roads. During the Great Recession, the State delayed payment of millions in State and Federal funds to Butte County. When the State delays payment, the County has difficulty meeting all of its obligations. This could delay payments to vendors (ranging from landlords to supply stores to child care providers to non-profit agencies providing services); contractors; and ultimately employees. The State has historically had an unfortunate tendency to pass cash flow problems on to counties. Although things have improved dramatically since the Great Recession, there are insufficient protections in place to shield the County in the event of another significant downturn.

Requested Action and Strategy

- Advocate for payment of remaining SB 90 claims and oppose actions to eliminate, delay or reduce payments to counties.

Contact: Paul Hahn, Chief Administrative Officer, 530-538-7631
2011 Realignment

Summary of the Issue

In the 2011 Legislative session, the State Legislature transferred responsibility for providing a number of public services from state government to counties and other local governments. The transferred responsibilities included law enforcement and public safety services, care for abused and neglected seniors and children, mental health and substance abuse recovery programs, and monitoring and detaining specified felony offenders. Though funding is provided for the realigned programs, it may not be sufficient to implement all programs fully, especially the realignment of felony offenders.

Requested Action and Strategy

- Advocate for full funding of realigned programs and a local funding allocation formula that provides a fair share to cover realigned programs in Butte County.
- Support legislation to prohibit the State from passing any new law or regulation that imposes additional costs on local governments to provide these services unless the State provides a source of state funding to pay the additional costs.

Contact: Andy Pickett, Deputy Administrative Officer, 530-538-7052
CHILDREN

Child Support Services

Summary of the Issue

The Child Support system in California has made great improvements and can continue to do so with some meaningful changes. Current law provides that the filing of abstracts be handled within each county and that each Local Child Support Agency issue income withholding orders to employers for child support obligors with cases in the child support enforcement program. A central statewide system to centrally house all state filings related to Child Support Services would be more cost-effective and would help facilitate services more efficiently.

Additionally, the current 10% interest rate on child support obligations is so high that balances are nearly impossible for parents to pay off, even if they are making sincere efforts. The result is many of these parents become discouraged and stop making payments altogether.

Many employers in California pay their employees in cash, enabling those employees who owe child support to avoid their legal obligations. Penalties for this practice should be to create a disincentive for allowing parents to avoid their financial responsibility to their children.

Requested Action and Strategy

- Support legislation to amend Family Code Section 4506, in order to require that all abstracts for Child Support Services be filed in a central statewide system.
- Support legislation to add a Family Code Section to require that all income withholding orders for child support obligations be filed in a central statewide system.
- Support legislation to eliminate or decrease the amount of interest on Child Support arrears.
- Support legislation to amend current law in order to increase the civil liability and penalties to employers who pay their employees cash.

Contact: Sang Kim, Deputy Administrative Officer, 530-538-4738
Drug Endangered Children

Summary of the Issue

The Drug Endangered Children (DEC) Program started in Butte County in 1993 and has been a model throughout the country. On average 200-300 children are removed from drug endangered living conditions each year. In drug raids prior to DEC, children at the scene—which was their home and included drugs, violence, chemical exposure, and filth—were not cared for as a priority. DEC involves personnel at the scene with the sole priority to remove the children safely and render immediate assessment and services. The DEC Team includes personnel from law enforcement, social services, the District Attorney’s Office, medical services and the Fire Department. All personnel assigned to the DEC Team require special and exceptional training.

Children removed from drug endangered homes have been found to have serious respiratory problems, delayed development, malnutrition, injuries from abuse and lack of medical treatment, emotional trauma and damaged internal organs. DEC provides interdisciplinary assessment, immediate services, referrals for specialist care and case management to ensure ongoing care and treatment.

Requested Action and Strategy

- Explore options for the State to fund the DEC program including providing a means of reimbursing county staff to periodically train personnel in other counties with respect to DEC procedures and processes.

Contact: Mike Ramsey, District Attorney, 530-538-7411

FIRE/EMERGENCY SERVICES

Cal-Fire Contract

Summary of the Issue

Butte County contracts with CAL FIRE to provide personnel to the Butte County Fire Department for countywide fire suppression and emergency response services. While this arrangement proved to be cost-effective in the past for both the County and the State, there are inherent issues that cause fiscal stress in the relationship. The State continues to pass on higher overhead rates every year in the form of a pro-rata statewide share of costs in addition to the Cal-Fire Admin Fee. The resultant increases in contract payments for fire services are paid from discretionary revenues at the County level.

Requested Action and Strategy

- Oppose legislative or administrative actions that will increase costs borne by the County.

Contact: Andy Pickett, Deputy Administrative Officer, 530-538-7052
HEALTH CARE

Changes to Welfare and Institutions Code 5150

Summary of the Issue

Welfare and Institutions Code 5150 et seq has provided a confusing and at times conflicting set of codes to provide for involuntary detainment and evaluation of individuals who are at immediate risk of harm due to a mental illness. While SB364 was signed into law in 2013, clarifying a few points of contention, there continue to be challenges to the process and resources related to involuntary detention and treatment of individuals with mental illness. SB 82 has also provided for short term funding to improve the crisis outreach and response system in the State. However positive this recent attention to mental health response to persons in crisis has been, there are continuing concerns related to an insufficient number of psychiatric hospital beds, inadequate funding for locked placements (IMD’s), and emergency departments struggling to work with psychiatric patients while awaiting placement.

Requested Action and Strategy

- Continue to advocate for sufficient funding and resources to improve access and continued care for individuals in crises
- Address resource issues related to unengaged individuals who come to the attention of law enforcement either through homelessness or criminal behavior due to untreated mental illness or alcohol and drug abuse, including the need for transitional housing.
- Continue to support efforts to further clarify the 5150 statutes.
- Support State efforts to modify Federal Medicaid regulations, Title 42, CFR, §35.1009/1010 (known as the “Institute of Mental Disease [IMD] Exclusion”) that prohibits federal reimbursement for mental health treatment in psychiatric inpatient facilities that have more than 16 beds. California is currently participating in a Federal demonstration project (sponsored under the Affordable Care Act and spearheaded by Senator Matsui in Sacramento and Contra Costa) to show the clinical and fiscal benefits of short-term emergency inpatient psychiatric care for individuals who receive these services in free-standing psychiatric hospitals that have more than 16 beds. Counties currently pay the entire cost when residents are served in these facilities which make up the majority of inpatient beds in the State. This regulation, enacted in 1965, has not kept up with the modernization of inpatient psychiatric care and should be modified so that these services are eligible for Medicaid reimbursement when provided in licensed, Medicaid eligible, psychiatric hospitals that are greater than 16 beds.

Contact: Dorian Kittrell, Behavioral Health Director, 530-891-2857
County Health Care Insurance Options

Summary of the Issue

The County currently contracts with California Public Employees’ Retirement System (PERS) for the provision of employee health insurance. In recent years, PERS has implemented significant health insurance premium increases, especially for the Northern California region. The County has requested rate setting and utilization information to better understand the extraordinary increases, and PERS claims it is unable to provide the requested information due to prohibition by State law. The County believes aggregate data should be available to contracting agencies in order to analyze health care utilization trends and to allow contracting agencies to seek other options on the market. Lack of aggregate data makes it impossible for contracting agencies to launch effective, targeted wellness programs that could positively impact future utilization and premiums, as well as seek quotes from other providers. Without utilization data, any quotes the County receives are estimates at best, and pure conjecture at the worst. Absent firm quotes, the County cannot make informed decisions regarding other options.

Requested Action and Strategy

- Continue advocacy efforts to compel PERS to release aggregate data and information to contracting agencies, including legislative efforts to modify the Government Code, where applicable.

Contact: Shari McCracken, Deputy Administrative Officer, 530-538-2863

LAW ENFORCEMENT

Vehicle License Fee

Summary of the Issue

In 2009, the State passed legislation increasing Vehicle License Fees (VLF) from 0.65% of the purchase price to 1.15% of purchase price. Of that increase, 0.15% was dedicated to support a range of local public safety programs that were formerly supported by the State General Fund. Local programs included the Citizens’ Option for Public Safety (COPS), Rural and Small County Sheriffs Assistance Grants, and various intervention and prevention services for juvenile offenders. The increased VLF went away on June 30, 2011, reducing funding again for these vital local criminal justice programs.

Requested Action and Strategy

- Protect funding for local law enforcement efforts and support legislation to provide additional funding to rural areas.

Contact: Kory Honea, Sheriff, 530-538-6759
       Mike Ramsey, District Attorney, 530-538-7411
Probation – Use of Third Party Researchers

Summary of the Issue

Probation departments have a long-standing history of contracting with researchers to evaluate the effectiveness of their programs. Research and evaluation is often a requirement of state and federal grant programs. Welfare and Institutions Code (WIC) 827 provides a list of individuals and agencies that may access confidential juvenile case records. Third party researchers are not included in the WIC827 list. WIC787 allows access to “sealed records” by researchers if the court is satisfied that the project includes a methodology for the protection of confidentiality. WIC787 applies only to sealed records and does not included access to unsealed records. The inability to use third party researchers restricts the ability to pursue certain grant opportunities and effectively implement evidence-based programs and practices.

Requested Action and Strategy

- Support efforts to amend WIC827 and/or WIC787 to allow third party researchers access to confidential case records in order to evaluate program effectiveness and meet grant requirements.

Contact: Steve Bordin, Chief Probation Officer, 530-538-7661

PRESERVING OUR COMMUNITIES

COMMUNITY SUPPORT

Efficient Operations of County Clerk-Recorder Functions

Summary of the Issue

Current laws lead to inefficiencies in the Clerk-Recorder functions, as well as additional unfunded mandates that will lead to further decline in the services the County is able to provide with discretionary revenue sources. There are many changes to laws that, if enacted, would help these aspects of county government function more efficiently.

Requested Action and Strategy

- Support efforts to protect all vital and official records against fraud, while ensuring their availability to authorized users.
- Support greater flexibility in the use of electronic recording for real property records that include appropriate precautions to protect consumers and homeowners against fraud.
- Oppose changes in the required format of public records that impose an unfunded mandate on counties.
- Oppose the addition of state fees to recordings where no clear nexus is drawn between the instrument and the proposed use of funds.
- Oppose decreasing the definition of reasonable response, which is currently defined as 10 days.
- Oppose a state mandated retention schedule for general documents.
- Seek grant funding for the preservation and storage of county archives.

Contact: Candace Grubbs, Clerk-Recorder, 530-538-7654
Election Operations

Summary of the Issue
Increasing rules and regulations at the State level regarding elections are costing local jurisdictions. Voting equipment and upgrades to electronic voting equipment currently approved by the Federal government are not allowed to be used in California, which further increases the costs of elections, restricts services to voters, and negatively impacts the discretionary resources available to all local governments to fund local programs such as law enforcement, fire and emergency services, and libraries.

Requested Action and Strategy
- Oppose legislation and administrative actions that increase the local cost of elections.
- Oppose legislation that does not lead to improvements in the election process.
- Support efforts to allow counties to fully utilize federally approved electronic voting systems and upgrades within California.
- Support legislation to hold election-by-mail in counties where the Board of Supervisors chooses to do so.
- Oppose legislation that increases local costs or administrative burdens if no funding is provided.
- Support funding for new voting equipment and systems that would enable more efficient elections at a reduced cost.

Contact: Candace Grubbs, Clerk-Recorder, 530-538-7654

Required Public Notices

Summary of the Issue
Current laws require public notices to be published in newspapers within the County for a variety of notifications. Allowing the notice information to be provided online has the potential to increase access to information because anyone with internet access may view this information, not just those that read the local newspaper. With the advent and continually increasing use of mobile devices from smartphones to tablets, traditional newspapers continue to experience a declining readership base. Online publication also makes the information available continuously for the entire required period.

Requested Action and Strategy
- Support legislation allowing agencies to meet state noticing requirements by posting detailed information on agency websites.

Housing Needs Plans

Summary of the Issue

State law requires the Department of Housing and Community Development and councils of governments/metropolitan planning organizations to prepare a Regional Housing Needs Allocation Plan to allocate a share of the regional housing need to each city and county. These allocation plans do not adequately recognize the limited availability of necessary public infrastructure in unincorporated portions of counties, particularly community sewer systems, community water systems, and public transportation. Regional Housing Needs Allocation Plans conflict with efforts to develop and implement the Sustainable Communities Strategy required by Government Code §65080 et seq, resulting in counties being unable to take advantage of streamlining in the California Environmental Quality Act and being at a disadvantage in transportation funding decisions in the Regional Transportation Plan process.

Requested Action and Strategy

- Support legislation to require the Department of Housing and Community Development and councils of government/metropolitan planning organizations to consider availability of necessary infrastructure and the Sustainable Community Strategy in the preparation of Regional Housing Needs Allocation Plans or pursue a process to exempt counties that are members of the Rural County Representatives of California from the requirement for Regional Housing Needs Allocation Plans.

Housing Rehabilitation

Summary of the Issue

In order to assist in bringing the housing stock in the unincorporated area of the County up to current health and safety standards, the County offers a housing rehabilitation loan program for qualifying low and moderate income property owners. Assistance is provided to home owners in the form of small grants or low interest loans. The program is typically funded through grants obtained through the State Community Development Block Grant (CDBG) program and the State HOME Investment Partnerships Program (HOME), as well as payments and payoffs from existing loan recipients. Due to a reduction in the amount available from CDBG, HOME, and other State grant programs, and the level of competition for the funds that do exist, it has been difficult for the County to secure the amount of grant funds necessary to respond to requests for assistance from County property owners. The types of improvements needed range from roof repair, to heating, to failed septic systems, to adequate cooking facilities.

Requested Action and Strategy

- Support efforts to provide funding to local jurisdictions for housing rehabilitation.

Contact: Casey Hatcher, Economic and Community Development Manager, 530-538-6182
Off-Highway Vehicles and Green Sticker Funding

Summary of the Issue
Green Sticker funds are collected from Off Highway Vehicles (OHV’s) and used by various State agencies to operate the OHV program with the remaining going to grants to enhance OHV opportunities throughout the state. Recently there have been attempts to use green Sticker funds for programs not related to the OHV program. OHV opportunities typically help support rural business by purchasing fuel and other supplies.

Requested Action and Strategy
- Protect green sticker funding for OHV program use only.
- Require the U. S. Forest Service to partner with local non-profits or governmental agencies in order to apply for green sticker funding.

Contact: Dennis Schmidt, Public Works Director, 530-538-7681

Regulation of Marijuana Cultivation

Summary of the Issue
Proposition 215 (the Compassionate Use Act of 1996) allows patients with a valid doctor’s recommendation, and the patient's designated Primary Caregivers, to possess and cultivate marijuana for personal medical use, and has since been expanded to protect a growing system of collective and cooperative distribution. The initiative was partially implemented through the California Medical Marijuana Program created by Senate Bill 420 (2003). Since SB 420, the production of medical marijuana has developed into a model that is functionally indistinguishable from a for-profit business. What the State of California has failed to realize is that marijuana, not just medical marijuana, has grown into a full-fledged industry in the State, yet there is no infrastructure designed to regulate such a complex issue.

Senate Bill 643 and Assembly Bills 243 and 266 enact the Medical Marijuana Regulation and Safety Act (MMRSA) and Proposition 64, passed by voters on November 8, 2016, enacts the Adult Use of Marijuana Act (AUMA). The MMRSA provides a licensure and regulatory scheme for medical cannabis activities and AUMA provides the same for recreational marijuana including: cultivation, manufacturing, testing, dispensing, distribution, and transportation. The legislation and the voter-approved measure each provide local control for licensing commercial marijuana activities. The new regulations are not yet operational, but the intention is to provide comprehensive, statewide regulations that effectively deal with marijuana activities and assist local governments in managing the myriad effects of this burgeoning industry.

Local government agencies continue to face many impacts arising out of the cultivation and distribution of marijuana, including the potential effects on the environment caused by cultivation (i.e., excessive water usage, uncontrolled pesticide use, and erosion); the creation of public and private nuisances due to strong odors; the heightened risk of electrical fires presented by indoor grows; negative health impacts, including those related to unregulated edible cannabis products; and safety concerns created by a high value crop or dispensary inventory. In addition to addressing
these concerns, local agencies must balance the concern of availability to qualified patients. Regulation at the local level is more effective because the potential impacts of marijuana vary broadly depending upon the geography and urban versus rural nature of counties and cities throughout California. Uncertainty in State legislation needs to be addressed to help guide local jurisdictions in balancing these concerns.

**Requested Action and Strategy**

- Support legislation that creates specific statutory authority to preserve local control but also establishes supportive compatible State regulation with regard to environmental, health, and safety standards for medical marijuana activities.
- Support legislation addressing the distribution of marijuana through delivery services rather than storefront dispensaries.

---

**Solid Waste Issues**

**Summary of the Issue**

In the County’s experience, the State Legislature passes bills that ban certain products from disposal without having a plan to finance the diversion of such products from disposal. The end result is that the County becomes responsible for the costs through its Waste and Recycling Facility and those costs are passed on to consumers through the gate fees that support the Facility. Currently, the County’s Waste Management Division spends upwards of $700,000 per year to manage household hazardous and other prohibited waste properly. In addition, costs of solid waste regulatory compliance are disproportionately high in rural areas of the State.

**Requested Action and Strategy**

- Support statewide planning for convenient identification and recovery of all material and products banned from California landfill disposal or requiring separate handling or processing and producer responsibility for financing and arranging for the collection and recycling of their products at end-of-life.
- Support the proper disposal of prohibited waste through programs that place the cost of compliance on manufacturers and consumers, rather than on county-operated landfills or waste management programs.
- Support efforts to ensure that costs of complying with regulations are commensurate with environmental and public health risks associated with solid waste operations.

**Contact:** Bill Mannel, Deputy Director, Waste Management Division, 530-879-2350
State Funding Cuts for Community Services

Summary of the Issue
State funding for public libraries and other community services has been eliminated over the years. The County has backfilled these lost State dollars with County General Fund dollars; funding that could have been used for other local priorities.

Requested Action and Strategy
- Pursue full funding for library programs including, but not limited to, the Public Library Fund and the Transaction Based Reimbursement Program.

Contact: Melanie Lightbody, Library Director, 530-538-7525

Property Tax Administration

Summary of the Issue
The County is responsible for all property tax administration activities, including apportionment and distribution of funds to all taxing agencies. The County is allowed to recover less than half of the more than $3 million annual cost of property tax administration because schools are included in the calculation, but exempted from collection. This exemption costs the County more than a million dollars every year, funds that could otherwise be spent on county services, including libraries, fire, and police protection.

Requested Action and Strategy
- Advocate for fuller allocation of Property Tax Administration costs, with schools paying a reasonable share of the cost to assess, collect, and distribute taxes.

Contact: Diane Brown, Assessor, 530-538-7314
Peggy Moak, Treasurer-Tax Collector, 530-538-7443
David A. Houser, Auditor-Controller, 530-538-7607

State Surcharges Collected by Counties

Summary of the Issue
There is a growing trend by State agencies to add an administrative surcharge to local fee-based programs. This practice places additional hardships on local businesses and gives the appearance that the County is charging higher fees. There are existing state surcharges on local fees related to land use, agriculture, and recording of documents, to name a few. Not all State surcharges provide for the administrative costs incurred by counties to collect the fees on the State’s behalf.

Requested Action and Strategy
- Oppose legislation that places a state surcharge on local fee-based programs and requires counties to act as collection agencies for the State.
- For mandated surcharges, support full funding by the State for the administrative overhead the County incurs for collecting the fees.

Drought Response

Summary of the Issue

California has been experiencing drought conditions of historic proportions. Butte County, through its Drought Preparedness and Mitigation Plan and the Emergency Operations Center, has identified local drought impacts and taken steps to mitigate and/or secure resources. The primary impacts will be to individual and small community water supply wells. Broad economic impacts may occur from surface water cutbacks and changes to the reservoir operations of Lake Oroville. If the drought persists, the impact to water supply reliability and the local economy will increase substantially. State and Federal assistance should include funding to mitigate the local impacts of the drought.

Requested Action and Strategy

- Support legislation that will assist Butte County in addressing localized drought impacts.
- Support legislation that will protect the local agricultural economy and local water supply needs.
- Oppose legislation that weakens area of origin water rights and water right priorities.

Cindi Dunsmoor, Emergency Management Officer, 530-538-7373
PUBLIC FACILITIES

Veterans’ Facilities

Summary of the Issue

The County is responsible for a variety of community facilities utilized by the residents of Butte County. Included in that responsibility are facilities that support veterans and veterans’ organizations, as well as facilities with local historical importance. The County is responsible for provision and maintenance of Veterans Halls for veterans in Butte County. Most of the halls are in aging buildings that require extensive maintenance and are in need of upgrades to meet Americans with Disabilities (ADA) requirements. Along with the Veterans Halls, the County acquired property in 2008 to allow development of a Veterans Memorial Park in Oroville. Although the County does not develop or operate parks, it does wish to support the Veterans Memorial Park Committee and the future operator in seeking funding for development of the proposed Park.

The County also owns a unique, historical building located at 900 Esplanade in the City of Chico. The building was built in 1926 as a Veterans Memorial Building and is located on the premier central boulevard of the City, enhancing its importance to the community. Numerous civic, philanthropic, cultural and education organizations would benefit from the rehabilitation of the hall and the use of this building’s large auditorium and performance stage. The only other structure with similar qualities in this community of nearly 100,000 people, and a region of over 200,000, is Laxson Auditorium on the campus of CSU-Chico. The lack of large meeting facilities limits the cultural and economic life of Chico.

Requested Action and Strategy

- Pursue funding to support the maintenance and upgrades of the County’s Veterans Halls.
- Pursue funding to support the Veterans Memorial Park Committee and future operator in their efforts to develop a Veterans Memorial Park.
- Pursue funding to support restoration of the facility located at 900 Esplanade in the City of Chico.

Contact: Grant Hunsicker, General Services Director, 530-538-2511
Community Facilities

Summary of the Issue

The County owns Southside Oroville Community Center in Oroville, home to the Boys & Girls Club and E-Center (the local Head Start program), as well as a community resource center and culturally appropriate behavioral health services. The facility is also used for a variety of community purposes including weddings, meetings, community band practice, senior dances and cooking classes. While only twelve years old, those in the community are unable to afford rental rates sufficient to properly maintain the building and no capital reserves have been accumulated for any form of maintenance program.

Requested Action and Strategy

- Pursue funding to support the operation and upgrades of community facilities/centers.

Contact: Grant Hunsicker, General Services Director, 530-538-2511

Energy Efficiency in Public Facilities

Summary of the Issue

In delivering services to the public, Butte County staff occupy more than 1 million square feet of office space in more than 100 buildings spread across the entire county. Given the age of most County buildings and limited funding, facilities budgets are not able to accommodate anything other than the most urgent major maintenance projects. This leaves no funding for installation of energy-saving fixtures and equipment that can save money in the long run. Funding is necessary for the replacement of aged electrical, heating, ventilation and air conditioning systems and energy efficient roofing components throughout the County inventory.

Requested Action and Strategy

- Support efforts to provide funding to local jurisdictions for the replacement of energy related furniture and fixtures in public facilities.

Contact: Grant Hunsicker, General Services Director, 530-538-7064
Public Facilities – Deferred Maintenance

Summary of the Issue

The average age of County facilities is nearly 50 years old with millions in deferred maintenance, inefficient building components and inadequate accessibility. Libraries top the list with law enforcement and general government facilities also in need of major renovation. In addition, facilities funding is often required to construct new facilities to accommodate state and federal mandated responsibilities. Local revenue sources are not sufficient to fully modernize existing County facilities, improve accessibility, and minimize unplanned service interruptions to the public.

Requested Action and Strategy

- Support efforts to provide funding to local jurisdictions for Facility Condition Assessments to aid County’s in planning methodology to address deferred maintenance.
- Support efforts to provide funding to local jurisdictions to modernize dated facilities with building envelope, energy and accessibility improvements.

Contact: Grant Hunsicker, General Services Director, 530-538-7064

Public Facilities – Project Delivery

Summary of the Issue

Senate Bill 854 negatively impacts the County’s ability to deliver even small facilities related projects efficiently. The bill requires contractors to register with the state when bidding on public works projects and any non-routine project valued $1,000 or more must be registered with the state so that prevailing wage payments can be audited. This creates significant administrative burden for just about every facilities related work order the County receives and the state registration process is not well implemented. As an example, a contractor’s license number is required to register a project but not all work completed under Senate Bill 854 is completed by a licensed contractor.

Senate Bill 785 negatively impacts the County’s ability to deliver large capital construction projects efficiently. This Bill requires that, when utilizing the Design – Build Project Delivery Method, labor must have graduated from an approved apprentice program. However, the County is in a rural setting that lacks such programs. This results in the County not being able to use local labor and it increases cost by forcing the County to bring in labor from other areas.

Requested Action and Strategy

- Support modifications to Senate Bill 854 in two ways:
  - Change the dollar threshold from $1,000 to the amount, currently $45,000, the California Uniform Public Cost Accounting Commission allows Counties to utilize force labor instead of contracted labor.
  - Remove from the definition of Public Works project any work that is performed by labor that does not require a contractor’s license such as systems furniture installation and window treatment services.

- Support modifications to Senate Bill 785 providing options for rural counties when the apprenticeship requirements cannot be met by local contractors.

Contact: Grant Hunsicker, General Services Director, 530-538-7064
Alternative Energy

Summary of the Issue
When the County completed the solar array installation in Oroville in 2004, it was the fourth largest in the nation at the time. The solar array powers portions of the main administration building, the main jail and other facilities on the Oroville government campus. In addition to $1 million in County funds, the project included $4.2 million in the form of a PG&E Grant and $3.2 million from a low interest loan from the California Energy Commission. Although a second phase was planned, the County lacks funds for the design and construction of additional solar arrays.

Requested Action and Strategy
- Support efforts to provide funding in the form of Grants or low cost loans to local jurisdictions for the design and installation of alternative energy production including solar.
