Butte County Water Inventory and Analysis Report, 2001. Prepared by CDM for Butte County Department of Water and Resource Conservation.

Contents

Section 1 Introduction to the Water Inventory and Analysis Project

1.1	Background.....	1-1
1.2	Purpose and Scope.....	1-2
1.3	Involved Parties	1-3
1.4	Contents of the Report	1-4
1.5	Inventory Units	1-6

Section 2 Water Resource Overview and Current Issues

2.1	Development of Water Resources in Butte County	2-2
2.2	Recent Events in California Water	2-3
2.2.1	Legislative.....	2-4
2.2.2	State and Federal Programmatic Actions.....	2-7
2.2.3	San Francisco Bay and Sacramento-San Joaquin Delta	2-10
2.2.4	Interstate Issues.....	2-13
2.3	Butte County Water Management Organizations and Plans	2-13
2.3.1	Butte County Water Management Organizations	2-14
2.3.2	Water Management Plans.....	2-19

Section 3 Physical Setting

3.1	Topography	3-1
3.2	Climate	3-2
3.2.1	Precipitation	3-2
3.2.2	Temperature	3-4
3.3	Geology and Soils	3-5
3.3.1	Geological Features	3-5
3.3.2	Soils.....	3-9
3.4	Hydrogeology.....	3-9
3.4.1	The Sacramento Valley Basin.....	3-10
3.4.2	The Foothill Region	3-17
3.4.3	The Mountain Region.....	3-18
3.5	Surface Water Hydrology.....	3-18
3.5.1	Surface Water Sources and Channels	3-18
3.5.2	Surface Water Flows.....	3-20
3.5.3	Flood Protection.....	3-24

Section 4 Water Management and Conditions

4.1	Water Rights and Deliveries.....	4-1
4.1.1	Surface Water	4-1
4.1.2	Groundwater Extractions	4-5

4.2	Supplies and Demands	4-9
4.2.1	East Butte Inventory Unit	4-11
4.2.2	Foothill Inventory Unit	4-27
4.2.3	Mountain Inventory Unit	4-32
4.2.4	North Yuba Inventory Unit	4-32
4.2.5	Vina Inventory Unit	4-33
4.2.6	West Butte Inventory Unit.....	4-34

Section 5 Supply and Demand Analysis

5.1	Methodology	5-1
5.1.1	Water Demand Methodology	5-2
5.1.2	Water Supply Methodology.....	5-5
5.2	Definition of Normal and Drought Scenarios.....	5-6
5.2.1	Definition of the Normal Hydrologic Scenario	5-6
5.2.2	Definition of the Drought Hydrologic Scenario.....	5-7
5.3	Summary of Normal year Inventory.....	5-8
5.3.1	Demands	5-9
5.3.2	Supplies.....	5-10
5.3.3	Net Groundwater Extraction	5-12
5.3.4	Shortages.....	5-13
5.3.5	Impacts on Groundwater.....	5-13
5.4	Summary of Drought Year Inventory.....	5-15
5.4.1	Demands	5-15
5.4.2	Supplies.....	5-17
5.4.3	Net Groundwater Extraction	5-18
5.4.4	Shortages.....	5-19
5.4.5	Impacts on Groundwater.....	5-20
5.5	Limitations	5-21
5.5.1	Data Collection.....	5-21
5.5.2	Analysis.....	5-22

Section 6 Additional Water Management Issues

6.1	Water Quality	6-1
6.2	Environmental Issues	6-3
6.3	Flood Control.....	6-4
6.4	Water Supply Reliability.....	6-7
6.5	Forecasts and Trends in Water Use	6-10

Section 7 Conclusions and Recommendations

7.1	Conclusions.....	7-1
7.2	Recommendations	7-2

Contents

Section 1 Introduction

Section 2 Basin Management Objective Development

2.1	Developing a Groundwater Level Objective	2-1
2.2	Water Quality Objective Development	2-3
2.3	Subsidence Objective Development.....	2-4

Section 3 Basin Management Objective Development Example

3.1	Area Description	3-1
3.2	Groundwater Level Objective Selection.....	3-1
3.3	Groundwater Quality Objective Selection	3-4
3.4	Subsidence Objective Selection.....	3-5
3.5	Example BMO Worksheet	3-5

Section 4 Regional Information

4.1	Regional Physical Setting	4-1
4.1.1	Surface Water Features.....	4-1
4.1.2	Geologic Setting.....	4-1
4.1.3	Fresh Water-bearing Units.....	4-2
4.1.4	Groundwater Conditions.....	4-3
4.1.5	Groundwater Quality Conditions and Subsidence	4-5
4.2	Regional Monitoring	4-6
4.2.1	Water Level Monitoring.....	4-6
4.2.2	Water Quality Monitoring	4-7
4.2.3	Subsidence Monitoring	4-7

Section 5 Angel Slough Area Information

5.1	Local Physical Setting	5-1
5.1.1	Surface Water Features.....	5-1
5.1.2	Geology.....	5-1
5.1.3	Groundwater Setting	5-2
5.2	Local Infrastructure Setting.....	5-2
5.2.1	Groundwater Use.....	5-2
5.2.2	Existing Infrastructure.....	5-3
5.3	Local Monitoring Activities	5-4
5.3.1	Water Well Terminology Overview	5-4
5.3.2	Water Level Monitoring.....	5-5
5.3.3	Water Quality Monitoring	5-8
5.3.4	Subsidence Monitoring	5-9

Butte County Groundwater Inventory Analysis, 2005. Prepared by DWR
Division of Planning and Local Assistance, Northern District.

In depth review of the Sacramento Valley Basin in Butte County. This report is available in hard copy for review at Butte County Department of Water and Resource Conservation, or can be ordered for \$20.00 from:

California Department of Water Resources
