

Report

**Butte County Department of Water and Resource
Conservation**

Integrated Water Resources Plan

Environmental Monitoring Plan

June 2004

David L. Brown, Department of Geological and Environmental Sciences
James C. Pushnik, Department of Biological Sciences
Michael P. Marchetti, Department of Biological Sciences
California State University, Chico

Contents

Section 1 Introduction

1.1	Project Description	1-1
1.2	Project Context.....	1-2
1.3	Purpose and Scope	1-3
1.4	Previous Studies	1-3
1.5	Document Overview	1-4

Section 2 Assessment of Current Habitats in Butte County [Sub-task 1]

2.1	Classification Systems.....	2-1
2.1.1	Natural Community/Ecological Site Classification.....	2-1
2.1.2	GAP-derived Habitat (Gap Analysis Program).....	2-1
2.1.3	Ecoregions	2-1
2.1.4	National Vegetation Classification	2-2
2.1.5	California State-specific Systems.....	2-2
2.1.5.1	California Wildlife Habitat Relationships.....	2-2
2.1.5.2	California Vegetation Classification and Mapping Program	2-2
2.1.5.3	California Gap Analysis Project.....	2-2
2.1.5.4	Sacramento River Conservation Area (SB 1086).....	2-3
2.1.6	Candidate Protocol.....	2-3
2.2	Habitat Categories.....	2-3

Section 3 Evaluation of In-stream Flow Requirement Estimation Approaches [Sub-task 2]

3.1	Streamflow Monitoring Within Butte County	3-1
3.2	Biological Background	3-1
3.2.1	Aquatic Resources of Butte County.....	3-1
3.2.2	Stream Health	3-2
3.3	Water Management and Planning	3-3
3.4	Recommended Approach.....	3-5

Section 4 Development of a Methodology for Establishing Baseline Conditions [Sub-task 3]

4.1	Native Vegetation.....	4-1
4.2	Aquatic Macroinvertebrate Reference Conditions in Butte County.....	4-2

Section 5 Concurrent Environmental Water Planning Efforts

5.1	California Water Plan Update 2003.....	5-1
5.2	Instream Flow Requirements in Butte County.....	5-1
5.3	Wild and Scenic River Flows in Butte County	5-1
5.4	Managed Wetlands in Butte County.....	5-2

5.5 Environmental Water Project – Butte Creek Instream Flow Augmentation..... 5-2

Section 6 Proposed Methods for Estimating Environmental Water Demand [Sub-task 4]

6.1 Model Selection 6-1
6.1.1 ET Models..... 6-1
6.1.2 Groundwater-Surface Water Models 6-2
6.2 Candidate Model Description 6-3
6.3 Conceptual Model of Habitats and Environmental Water Demand..... 6-5
6.4 Integration of Terrestrial and Instream Water Demand Estimates 6-6

Section 7 Proposed Long-Term Monitoring Program [Sub-task 5]

7.1 Remote-Sensing 7-1
7.2 Field Surveys 7-3
7.2.1 Vegetation 7-3
7.2.2 Soil Types 7-4
7.2.3 Atmospheric Conditions 7-4
7.2.4 Field Notes 7-5
7.3 Field Monitoring..... 7-5
7.3.1 Climate Monitoring 7-5
7.3.2 Monitoring of Depth to Shallow Ground Water 7-6
7.3.3 Remote Sensing..... 7-6
7.3.4 Monitoring of the Source of Water 7-6

Section 8 Proposed Implementation of Environmental Monitoring Plan

8.1 Phase 1: Preliminary Demand Analysis 8-1
8.1.1 Terrestrial vegetation systems 8-2
8.1.2 Aquatic Systems..... 8-2
8.1.2.1 Fish Use of Aquatic Habitat 8-3
8.1.2.2 Aquatic Insect Use of Habitat..... 8-3
8.1.2.3 Physio-Chemical Evaluation of the Habitat..... 8-3
8.2 Phase 2: Conduct County-wide Assessment..... 8-4
8.3 Long-Term Monitoring..... 8-4
8.4 Phase 1 Preliminary Cost Estimate 8-4

Section 9 Summary and Recommendations

Section 10 References

Appendices

Appendix A Gaging Stations in Butte County

List of Tables

Table 4-1 Aquatic Macroinvertebrate Sampling Locations	4-2
Table 5-1 Water Demand for Managed Wetlands in Butte County.....	5-2
Table 6-1 Comparison of Evapotranspiration Computational Methods.....	6-4

List of Figures

Figure 1-1 Butte County Vicinity Map.....	1-1
Figure 1-2 Butte County Hydrology Map	1-3
Figure 3-1 (a) Chinook salmon (<i>Oncorhynchus tshawytscha</i>) (b) Western pond turtle (<i>Clemmys marmorata</i>).....	3-2
Figure 5-1 Butte Creek Hydrology.....	Follows page 5-3
Figure 5-2 Upper Butte Basin Wildlife Area.....	Follows Figure 5-1
Figure 6-1 Conceptual Model of Environmental Water Demand for Butte County	6-6
Figure 6-2 Modeling Flowchart of Environmental Water Demand for Butte County	6-7
Figure 6-3 Plant Water Relationships in Surface Water-Shallow Groundwater Systems.....	6-8
Figure 7-1 Multispectral Land Image	7-2
