1	Building Permit Amnesty		COMPLETE					
2	Payment of Direct Charges		COMPLETE					
3	Agricultural Re-Use (ZCA07-0005) Prepare ordinance revisions to allow consideration of a conditional use permit to utilize existing conforming or non-conforming infrastructure and buildings that are located in the Agricultural areas of the County for Ag-related industrial or commercial uses.	Several locations of vacant or underutilized buildings/infrastructure within agricultural zones. These are typically non-conforming or the non-conforming status has expired. The buildings remain vacant, often not well maintained and likely will not be removed to turn the property into productive agricultural land. There is a need to have support industry related to the Agricultural community in near proximity to the user. Current codes do not facilitate re-use or rehabilitation of these buildings.	Inter-Departmental Review Committee June 4, 2008. Review by Farm Bureau General Plan Subcommittee July 11, 2008. Full Farm Bureau Review August 7, 2008. Final Farm Bureau comments pending.	Review Farm Bureau comments upon receipt; CEQA review of additional parcels suggested through Farm Bureau.	Draft Ag. Re-Use ordinance reviewed March 26, 2008 Draft Ag Re-Use Site Inventory reviewed May 28, 2008. Revised draft ordinance and site inventory available for Users Group Review July 30, 2008.	Draft PC package submitted to County Counsel for review 6/27/08. Counsel provided comments 7/08/08. Revised draft ordinance submitted to Counsel 7/15/08. Counsel provided comments on revised draft ordinance 7/25/08.	TBD	TBD

Interim Amendments Status 10/07/2008

	<p>use intensity restrictions and is misleading as parcel sizes under zoning range from 4,000 to 7,000 square feet. Intensity of permitted development should be either through lot coverage or floor area ratios. This additional change would encourage context sensitive design through the use of provisions for "flex-lot" and Planned Unit Development subdivisions.</p>

PRIORITY	TOPIC	PROBLEM STATEMENT	STATUS	NEXT STEPS	USERS GROUP	COUNTY COUNSEL	PLANNING COMMISSION	BOARD OF SUPERVISORS
6	<p>Zoning Administrator Consider the establishment of an administrative hearing process (e.g. Zoning Administrator) to expedite the approval of routine, non-controversial projects: including, parcel maps, map extensions, lot line adjustments, certificates of compliance, and minor use permits. The idea would be to modify Code Section 24-70.</p>	<p>Too many minor projects require too much work to achieve a decision. The County could develop streamlined staff report, Environmental Review, and findings processes to save time. Such a process would still provide for appeals to the PC and BOS. It is estimated over 100 of 215 projects could be eligible for this process.</p>	<p>50% Admin. Draft</p>	<p>Complete Admin. Draft. GP 2030 Board Subcommittee discussion April 24, 2008.</p>	<p>TBD</p>		<p>TBD</p>	<p>TBD</p>
7	<p>Flex Lots A flex lot subdivision application cannot be processed within the FEMA 100-year flood designation.</p>	<p>This means that a standard lot layout pattern can be processed for hearing but a flex lot (a provision that allows smaller lots with larger open space for avoidance of sensitive areas, common space and other amenities) cannot be processed. The ordinance does</p>	<p>Preliminary research</p>	<p>Prepare Admin Draft</p>	<p>TBD</p>		<p>TBD</p>	<p>TBD</p>

8	<p>5% Adjustment The minimum parcel sizes, particularly in the larger parcel designations, are absolute. For example in a 20-acre minimum zone, you must have 20.00 acres for each parcel proposed in a lot split. Including a provision for a 5% adjustment provided the intent of the zone is maintained subject to Director determination is one approach to consider.</p>	<p>It is not uncommon to have larger parcels that are slightly under the nominal acreage. Example - you cannot create four parcels in a 20-acre minimum designation if you are starting from 79 acres.</p>	<p>Administrative draft under review</p>	<p>Revise Admin Draft</p>	<p>TBD</p>		<p>TBD</p>	<p>TBD</p>

TBD	<p>Small Wineries Amend the code to allow greater latitude for tourism at small wineries. On 4/08/08, the Board indicated interest in exploring opportunities to facilitate tourism at olive orchards and tasting rooms through this code fix.</p>	<p>Current zoning restricts tasting at small wineries to 3 days per week. Vans, buses, and outdoor amplified music are prohibited. Small winery owners indicate that these restrictions limit their success and the success of agri-tourism in the County.</p>	Preliminary research		TBD		TBD	TBD

Interim Amendments Status 10/07/2008

TBD	<p>Fence Materials Definitions; Section 24.305.160 - Revise definition of "fence" to clarify the list of permitted construction materials to assist in code enforcement.</p>	<p>This was recommended by the Code Enforcement Advisory Board. Code enforcement occasionally encounters proposals to "fence the junk". With some of these cases, the property owner builds a fence out of materials such as car hoods, metal garage doors, stacked car tires and other used materials. An argument then begins about what constitutes a fence. The existing ordinance can be modified to clarify the fence standards and add efficiency to code enforcement process.</p>	Preliminary research		TBD		TBD	TBD

TBD	<p>Solar Fee and Wind Turbine Exemptions Explore the option of creating a Fee Exemption for solar Building Permits. The goal is to create an ‘incentive’ for people to install solar panels in Butte County. This would include research of Grant Programs to provide a ‘backfill’ of lost revenue that would cover plan check and inspection services. Board direction on 3/25/08 including exploring exemptions and/or incentives to use wind turbines for power generation.</p>	<p>There is not a specific problem with this item. The current Building Permit fee is \$408 for roof-mounted solar panels. This is presented as an opportunity to highlight solar energy production in Butte County by providing a permit incentive.</p>	Preliminary research	Pending

5	Grading Ordinance Revision: Amend Article I of Chapter 13 of the Butte County Code to establish standards, plan review and permit processes for grading and earthwork including the control of erosion and sedimentation.	Existing County Code requires a grading permit for earthwork exceeding 1,000 cubic yards that is located above 300 feet mean sea level as well as for building permits and other County discretionary permits such as subdivisions, Use Permits, mining etc. However, County Code is silent on all other grading activities not associated with the permitted activities discussed above.	The Board Committee (Supervisors Josiassen and Connelly) and the User Group have reviewed a number of drafts and revisions. The User Group had a 1-hour workshop on this subject on February 27, 2008.	Based on comments from Users Group and Committee, staff is making revisions to the proposed ordinance.				TBD
6	Issuance of development permits on parcels that were initially created in violation of the County Code but can now be shown to meet code requirements	Undeveloped parcels, created more than 30 years ago, technically in violation of the County Code cannot obtain permits for development without first obtaining a Certificate of	Staff preparing administrative draft Ordinance.
