**OBSERVATIONS AND CORRECTIVE ACTIONS**

- 9- Observed two sealed bags of soup/sauce (125°F-127°F) on prep sink improperly cooling on top of shallow container of melted ice. When cooling food such as bagged soup in ice, ensure ice completely surrounds bag and that ice is maintained (i.e.: keep water drained and replace ice as needed). Note: Bagged soups moved to walk-in freezer during inspection to complete cooling process.
- 36- Observed accumulated food debris in bottom of container storing eating utensils. Clean. Provide tongs for cut lemons at customer self service counter.
- 44- Observed gap under back door. Provide weather strip.
- 45- Clean floor sinks under beverage dispenser and prep sink to remove accumulated residues and floors in hard to reach places (under racks, beverage syrup boxes, etc.) to remove dust/debris.
