Food Safety Cert Name: Tomas Hernandez	Exp. Date: 6/24/2013
Page 2 of 2	

OBSERVATIONS AND CORRECTIVE ACTIONS

Lynn's Chinese Cuisine

7, 35) Top portion of prep refrigerator was 51°F upon inspection. Cooked pork was observed to be 47°F. Pork was moved to bottom portion of refrigerator during inspection. Repair or adjust prep refrigerator so as to maintain foods at or below 41°F or store only non-potentially hazardous foods in the top portion of the refrigerator. Refrigerator unit must be replaced in the event of another potentially hazardous food temperature violation.

14) Utensils are reportedly cleaned once after lunch. Utensils must be washed, rinsed and sanitized at least every four hours.

27) Observed raw meats stored above produce and ready to eat foods in upright refrigerator. Raw meats must be stored below and separate from produce and ready to eat foods so as to prevent cross-contamination.

30) Observed some uncovered food items stored in the walk-in cooler, domestic refrigerator and freezers. Food must be stored in containers with tight fitting lids so as to protect from contamination. Observed an open pan of sweet and sour sauce stored on the floor of the walk-in. Food must be stored at least 6 inches off the floor.

33) Continue to clean shelving throughout facility, especially where "clean" dishes/glassware and food is stored, to keep clear of food debris and residues.

- Continue to clean tables/shelves in walk-in cooler to keep clear of food debris and residues.

35) - Replace domestic upright refrigerator once existing unit is not operable.

- Continue to clean interior/exterior of all equipment to keep clear of food residues and grease.

NOTE: Worn/torn door seals on prep refrigerator were painted so as to be smooth and cleanable. This is a temporary repair and door seals must be replaced once paint is worn.

36) Remove/replace all worn and un-cleanable pans/utensils (i.e. un-cleanable pans with encrusted debris, worn water pitchers in wait station, etc.) with NSF approved commercial equipment.

44) Observed some personal food stored in walk-in cooler. Provide a separate and designated area for all personal food items.

45) - Continue to clean floors and walls throughout facility, especially under/behind equipment/shelving and including inside walk-in cooler, to keep clear of food debris and residues, grease, dust and trash.

- New wall repair under utensil sink is hard to clean. Replace so as to be smooth, non-absorbent and easily cleanable using approved materials only.

- New wall repairs in walk-in cooler are hard to clean. Adjust/repair newly installed wall materials so as to be smooth and easily cleanable (i.e. seal all exposed edges and bolts; replace small pieces of FRP board so they are not overlapping).

NOTE:

- Installation of a 3-compartment sink will be required if the dishwasher is not operating properly upon inspection.
- Shelving repairs will be accepted on a performance basis. All shelving must be refinished or replaced so as to be smooth, durable and easily cleanable upon change of ownership or remodel.

Optimo Bar and Lounge

33) Continue to clean storage shelves where "clean" utensils and glassware is stored.

35) - Replace ice bin with an NSF approved ice storage bin with integral cold plate so that liquid waste drain lines do not pass through storage bin **within 3 months.**

- Repair leaking ice machine.

45) Continue to clean floor in bar, especially in hard to reach areas, to remove accumulation of water, mold, debris, etc.
