<sup>P</sup> Provisionally certified designer:

One of the requirements for full designer certification is for the designer to be a professional engineer, professional geologist, nationally certified soil scientist, or Registered Environmental Health Specialist

Designers who do not meet this requirement may be provisionally certified when: (1) evidence is provided showing a minimum of two years experience actively designing supplemental treatment wastewater systems under the supervision of a certified designer or professional engineer, (2) the designer has successfully completed the designer certification examination, and (3) the designer has completed the required continuing education.
