

CONSUMER CONFIDENCE REPORT REQUIREMENTS

Section 64480 of Title 22, California Code of Regulations, requires every community and nontransient noncommunity water system to annually prepare a Consumer Confidence Report (CCR) to inform users of the quality of their water supply. The system must mail or deliver a copy of that report to each customer. This report is due to be completed and delivered to customers and to this office by July 1st of every year. As a reminder, any monitoring and reporting violations must be included in the CCR. A blank CCR template, a certification form, and guidance materials are located at the California Department of Public Health's (CDPH) website at:
