**Aboveground Petroleum Storage Tank Facility Statement**

DATE SUBMITTED:						
<b>I. FACILITY INFORMATION</b>						
FACILITY ID # (Agency Use Only)						1
BUSINESS NAME (Same as FACILITY NAME or DBA-Doing Business As)						3
BUSINESS SITE ADDRESS <span style="float: right;">103</span>		CITY <span style="float: right;">104</span>		ZIP CODE <span style="float: right;">105</span>		
CONTACT NAME <span style="float: right;">117A</span>		CONTACT PHONE NUMBER <span style="float: right;">118A</span>				
Does the facility have a SPCC plan? <input type="checkbox"/> YES <input type="checkbox"/> NO <small>920 (see reverse for instructions)</small>		Date of the SPCC Plan Reviewed/ Revised:				
<b>II. TOTAL FACILITY CAPACITY</b> (in gallons) <span style="float: right;">921</span>						
Facility's total aboveground petroleum storage capacity for all tanks and containers equal to or greater than 55 gal.: <span style="float: right;">gal</span> <small>(see reverse for instructions)</small>						
Capacity of the largest tank/container that stores petroleum at your facility (in gallons): <span style="float: right;">gal</span>						
<b>III. TANK DETAILS</b> For each storage tank that exceeds 10,000 gallons in capacity and that holds a substance containing at least 5 percent of petroleum. (attach additional forms if needed)						
TANK USE CODE <span style="float: right;">922</span>						
1a. MOTOR VEHICLE FUELING		1b. MARINA FUELING		1c. AVIATION FUELING		
2. BULK PRODUCT STORAGE		3. GENERATOR FUEL		4. OIL-FILLED EQUIPMENT		
5. WASTE		6. OTHER (specify)

**Aboveground Petroleum Storage Tank Facility Statement**

					<input type="checkbox"/> Yes <input type="checkbox"/> No
					<input type="checkbox"/> Yes <input type="checkbox"/> No

**IV. APPLICANT SIGNATURE**

**CERTIFICATION:** I certify under penalty of law that this AST system is compatible with the hazardous substance stored and that the information provided herein is true, accurate, and complete to the best of my knowledge.

APPLICANT SIGNATURE	DATE
APPLICANT NAME (print)	APPLICANT TITLE

**FACILITY/BUSINESS INFORMATION**

- 1. FACILITY ID NUMBER – This space is for agency use only.
- 3. BUSINESS NAME – Enter the complete facility name.
- 103. BUSINESS SITE ADDRESS – Enter the street address of the facility, including building number, if applicable. This address must be the physical location of the facility. Post office box numbers are not acceptable.
- 104. CITY – Enter the city or unincorporated area in which the facility is located.
- 105. ZIP CODE – Enter the zip code of the aboveground storage tank facility. The extra 4 digit zip may also be added.
- 117a. CONTACT NAME – Enter the name of the contact person who receives Aboveground Storage Tank correspondence.
- 118a. CONTACT NUMBER – Enter the phone number, area code first, and any extension of the contact person at this site.
- 920. DOES THE FACILITY HAVE A SPCC PLAN- Check the box? A Spill Prevention, Control and Countermeasure (SPCC) plan is prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency’s Web site at <http://www.epa.gov/oilspill/> . This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained at the tank facility. In the space next to the box, enter the date that you last reviewed or revised your facility’s SPCC plan.

**TOTAL FACILITY CAPACITY**

- 921. TOTAL FACILITY CAPACITY – Enter the facility’s total petroleum aboveground storage tank capacity (in gallons). Aboveground storage tank means a tank or container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground. Petroleum is defined as crude oil or any fraction which is liquid at 60° at normal atmospheric pressure; does not include Liquid Propane Gas. Storage includes standby storage, seasonal storage, and temporary storage. To calculate the capacity of 55 gallon drums on site, use the **maximum** number of drums that would typically be temporary storage.

**How to Calculate Total Petroleum Capacity for your Facility: a + b + c = Total Facility Capacity**

No. of tanks and containers x size= Total Capacity <i>in gallons</i> (e.g., 2 x 550 gal. AST = 1100; 6 x 55 gal. drums = 330; 1100 + 330 = 1430 gals)		
_____ x 55 gal. = _____	_____ x 1,000 gal. = _____	_____ x _____ gal. = _____
_____ x 100 gal. = _____	_____ x 2,000 gal. = _____	_____ x _____ gal. = _____
_____ x 250 gal. = _____	_____ x _____ gal. = _____	_____ x _____ gal. = _____
_____ x 500 gal. = _____	_____ x _____ gal. = _____	_____ x _____ gal. = _____
Subtotal (a) = _____	Subtotal (b) = _____	Subtotal (c) = _____

**TANK DETAILS** for facilities with tanks 10,000 gallons in capacity or more (attach additional forms if needed). If your facility does not have a tank with shell capacity of 10,000 gallons or more, you can skip questions 922-927.

- 922. TANK ID NUMBER – Enter a unique tank identification number for each tank. You may create your own numbering system.
- 923. TANK CONTENTS – Enter the contents (i.e., DIESEL, GASOLINE, OIL, etc) of the aboveground petroleum storage tank.
- 924. CAPACITY – Enter the aboveground storage tank’s capacity (in gallons)
- 925. TANK LOCATION – Tank location is not required on this form provided an owner or operator of a “Tank Facility” has submitted a hazardous materials business plan (bp), as defined in subdivision (e) of Section 25501, to the CUPA. If all SPCC-regulated tanks are not indicated on the BP site map, you must send an updated BP site map and a Business Owner/Operator Identification page with this Tank Facility Statement.
- 926. AGE OF TANK – Enter the age of each aboveground storage tank (in years).
- 927. SECONDARY CONTAINMENT – Check the appropriate box if the tank has secondary containment.

**SIGNATURE**

- APPLICANT SIGNATURE – The application form must be signed, in the space provided
- APPLICANT NAME – Print or type the full name of the person signing the form.
- DATE – Enter the date (MM/DD/YYYY) the form was signed.

**INSTRUCTIONS AND DEFINITIONS:**

A “**Tank Facility**” is defined as any one, or combination of, aboveground storage tanks, including any piping that is integral to the tank, **that contains petroleum** and is used by a single business entity at a single location or site. A “Tank Facility” is subject to the Aboveground Petroleum Storage Act (APSA) if the “Tank Facility” is subject to the oil pollution prevention regulations specified in Part 112 (commencing with Section

## Aboveground Petroleum Storage Tank Facility Statement

112.1) of subchapter D of Chapter I of Title 40 of the Code of Federal Regulations; **or** the "Tank Facility" has a storage **capacity** of 1,320 gallons or more of petroleum.

**Aboveground storage tank (AST)** – A tank (or container) with a capacity to store 55 gallons or more petroleum that is substantially or totally above the surface of the ground. (This includes drums, totes, etc)

**Petroleum** – Crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit and 14.7 pounds per square inch absolute pressure. If the container or tank contains a mixture of petroleum which could cause a sheen, sludge, or emulsion in or on water, it must be disclosed. There is no exemption based on the percentage of oil. Include the shell capacity of all containers and aboveground tanks (including containers) with a capacity of 55 gallons or more.

**Storage** – Containment, handling, or treatment of petroleum, for any period of time including on a temporary basis.

**Storage capacity** – The aggregate **capacity** of all aboveground storage tanks (including containers 55 gallons and greater in capacity) at a "Tank Facility". A facility with an aggregate **storage capacity**  $\geq$  1,320 gallons of **petroleum (a substance containing any amount of petroleum)** is subject to the SPCC rule. For example, if a facility has two-500 gallon AST's and one- 600gallon AST, and only keeps them half full, the storage capacity for this facility is calculated by the capacity of each tank which equals 1,600 gallons and is subject to the SPCC rule.
