

INFLATABLE Pool

SAFETY WARNING

An average of **280 children under the age of 5** drown each year in swimming pools, and there are an **increasing number of deaths in inexpensive, inflatable pools.**

Parents need to be **aware that any pool poses a risk to young children.** The sides of inflatable pools are flexible and sometimes slanted or low, so it may be easier for a child to climb inside.

Local building codes may require **barriers like fences** around these pools to **protect young children.**
